PMG® Self-sealing
see through pouches

Especialistas en Esterilización y Envase

A MEMBER OF THE STERIMED GROUP

EEE packaging comply with the following standards:

ISO11607-1 Standard that is currently accepted internationally for sterilization packages

European Comision Regulations Standards EN868-5

Self-sealing medical grade see-through pouches with adhesive closure, our new system improves sealing when compared to conventional self-sealing sterilization pouches (with and adhesive strip). By simply sliding the adhesive strip (having to exert pressure to adhere) it achieves a fast and secure seal.

Features:

- The containers have a self-sealing band.
- Allows the identification of the content.
- Controlled porosity.
- High resistance to the sterilization process.
- Superanti®* treatment (Microbicidal agent active against various types of bacteria).
- The bags have indicators that attest to the passage of sterilization processes by Steam, Gas O.E. and Formaldehyde.
- Variety of sizes.

***Optional**

PMG® Self-sealing through pouches with autoseal

Catalog	Widht (cm)	Length (cm)	Unit per Box
PAR753D	9	23	200
PAR803D	7.5	28	200

PAR198D	30	55	5	250

Superanti® *Pat. No. 291594*

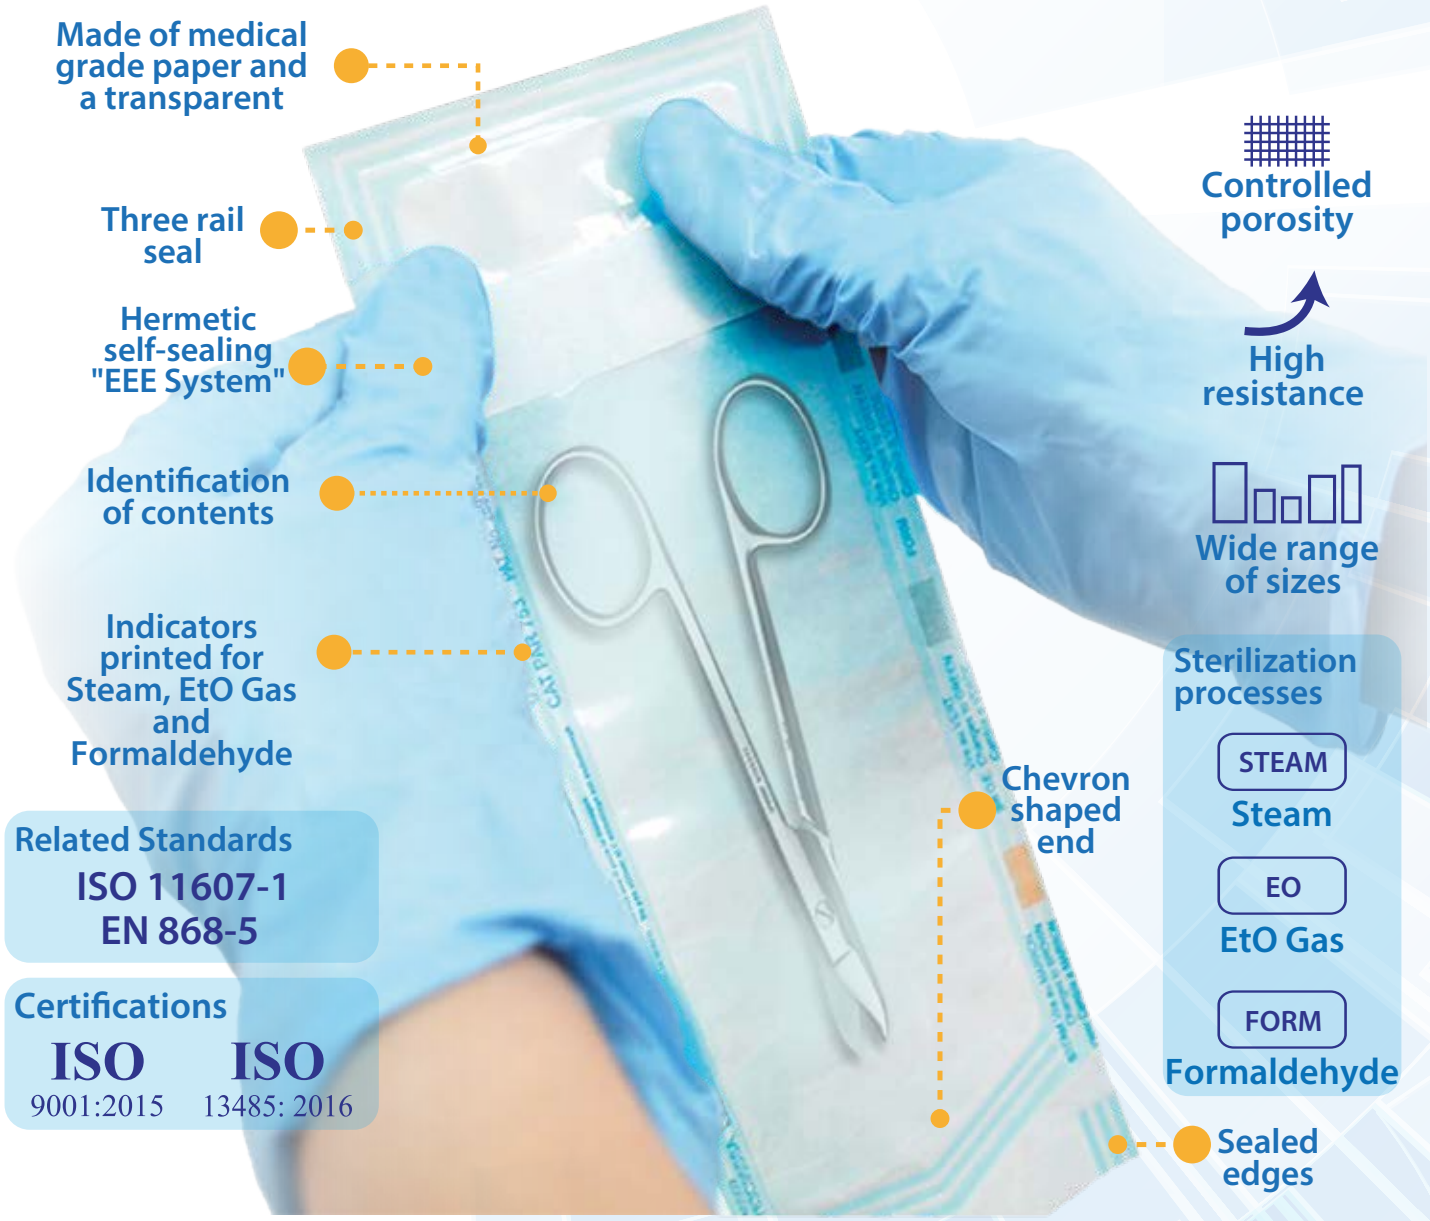

Superanti® is a microbicidal agent active against various types of microorganisms that prevents their installation and development. Its presence reduces the possibility that the packaging will become a polluting vehicle on the outside during handling, transport and storage, as well as at the time of use, helping to keep the surgical field as aseptic as possible.
