Pouches

Medical-grade paper - ETHYPEL® Premium ST
Plastic film - Polyethylene (PE) / Polyester (PET)

Description:

Mixed pouch composed of 60 g/m² "ETHYPEL® Premium ST" medical-grade paper with surface treatment and plastic film.

Application:

Designed as primary sterile barrier packaging for medical devices intended to undergo sterilization processes.

This packaging provides excellent peelability due to its surface treatment, which ensures strong fiber cohesion for safe and aseptic opening.

Use:

Recommended for packaging IV sets, infusion kits, intravenous devices, hemodialysis kits, surgical kits, catheters, and puncture devices (syringes, needles, tips).

Intended to maintain the sterility of its contents.

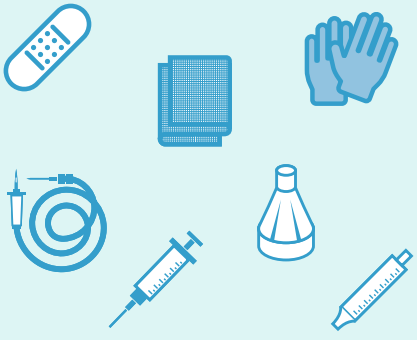

Sterilization methods:

IRRADIATION Sterilization — Gamma irradiation

EO Sterilization — Ethylene Oxide gas

Use

EEE México
